

6516207230.txt

As a truckdriver, I need to hear traffic and weather reports before I reach my destination so that I can reroute if necessary. I have been an xm radio subscriber for six months and cannot imagine driving without it.

I urge you to reject Petition 04-160. Perhaps the National Association of Broadcasters should devote their time and efforts to competing with xm radio, rather than trying to destroy it. After all, isn't competition the American way?
